

BEFORE

Short Street is a little traveled, one way, one-half block street downtown.

Short Street is located in the heart of the downtown.

SHORT STREET PLAZA

THE CREATION OF AN OUTDOOR PLAZA IN THE HEART OF THE DOWNTOWN BY CLOSING SHORT STREET

AFTER

The Short Street plaza is key to creating a pedestrian friendly downtown.

LOCATION MAP

Creation of the Short Street Plaza provides downtown events space connected to local attractions including the Depot Events Center, Whitefront Cafe, and the Park Theatre.

PROJECT VISION

When completed, this project will develop an outdoor plaza in the heart of the downtown. This plaza will be created by closing Short Street, which is a one-half block long, one-way street downtown.

Located immediately adjacent to the Depot Events Center, the Park Theatre, White Front Café and other local attractions, the plaza will serve as the central gathering place for the community. Markets, festivals and events will all be accommodated by the plaza space. Notably, the space will compliment the programmed uses at the Depot Events Center by providing outdoor space for events.

Improvements will consist of removing existing pavement, installing decorative brick paving, new landscaping, lighting, power for events and related facilities.

PROJECT READINESS

The City currently owns right of way of Short Street. Preliminary engineering has been completed, and design of the plaza can begin immediately upon project award, and is expected to move into construction in the second year of the Stellar Communities program.

PROJECT BUDGET

\$925,000

PROJECT SCHEDULE

- Year 1: Engineering and Environmental
- Year 2: Construction
